Step by Step Configuration

This tutorial shows how you can schedule the sending of a command to Serial Port in Bill Redirect, at the time and frequency that you specify.
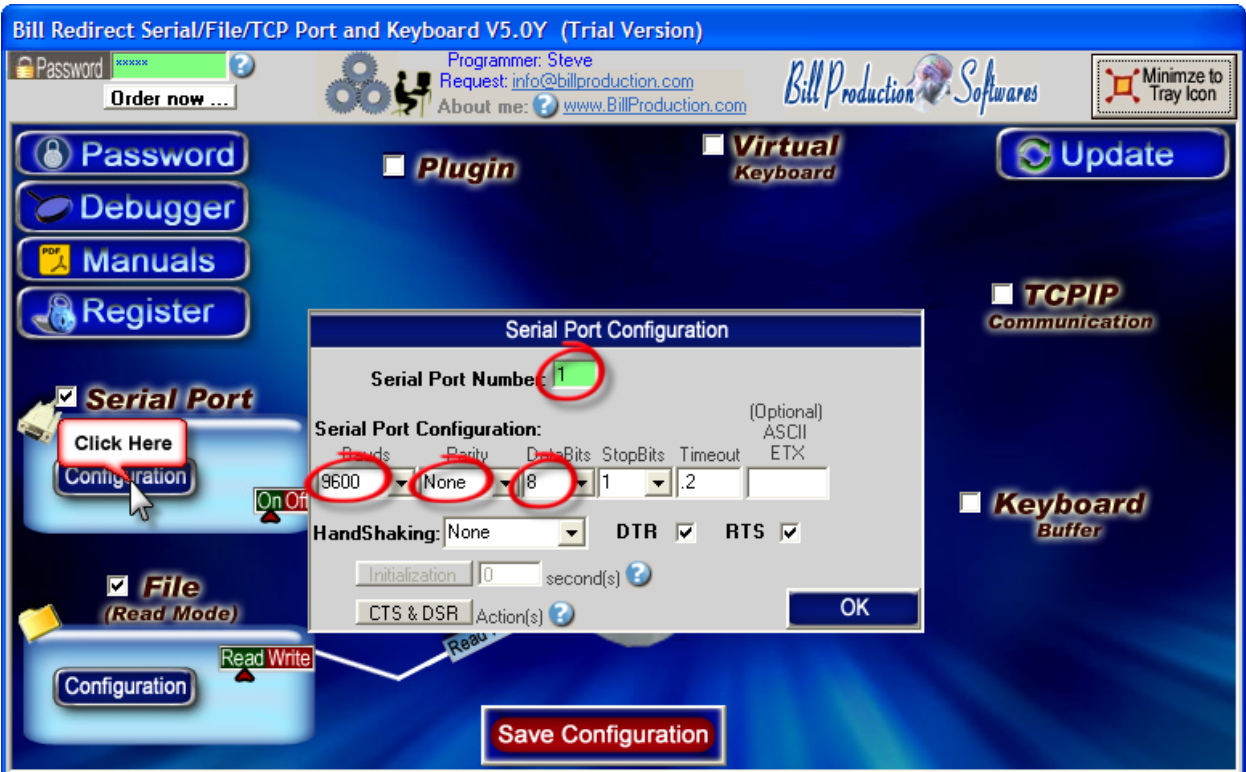

Perfect to control peripherals like:
Bell systems, light, access control, motor, clock display, messages display panel ...

Step #1 *(General)*

Disable all except the Serial Port and File sections
Set File to Read Mode

Step #2 *(Serial Port Configuration)*

Click on button Serial Port: Configuration
Set the HandShaking to: **NONE**
Activate the options: **DTR** and **RTS**
Enter the Serial Port Number where your peripheral is connected
If the back color field is GREEN, it's because the COM is present and available.

Serial Port Configuration: Enter the configuration of your peripheral
Use this section to sets the baud rate, parity, data bit, stop bit, timeout *(in seconds) and ASCII ETX* parameters.

Step #3 (File Configuration)

Click on button File: Configuration
Enter in field "File:" : C:\BillProduction.CFG\XPEFILE.TXT

Step #4

Download and copy this file:
## http://www.billproduction.com/BillRDoAction.exe
to your directory:
C:\BillProduction.cfg\

Step #5 (Windows Microsoft Task Scheduler)
Windows XP
*** If you use Windows Vista, go to Step 7**

Click on: Control Panel/Scheduled Tasks

Select: Add Scheduled Task

Click browse and locate the file: C:\BillProduction.cfg\BillRDoAction.exe

- Select how often you would like to perform the task.
- Select the time and the days of the week and click next.
- On the final screen, put a checkmark the box that says *"Open advanced properties for this task when I click Finish"* and then click finish.

Step #6 (Windows Microsoft Task Scheduler)
Windows XP

Now we will see the advanced properties window

Replace the word **command** by your command(s)

Example to send Hello on the Serial Port use: {TX_SERIAL[Hello{ASCII:13}{ASCII:10}]}

To see all possible commands, please consult the manual Bill Redirect

**http://www.billproduction.com/Bill_Redirect_Manual.pdf**

Step #7 (Add Scheduled Task)
Windows Vista

Click on: Control Panel/Administrative Tools/Task Sheduler

Click on the "Create Task" Action item … This will open the Create Task Window.

Click on the Triggers tab click on the "New" box.
- Select how often you would like to perform the task.
- Select the time and the days of the week and click next.

Step #8 (Add Scheduled Task)
Windows Vista

Click on the Actions tab click on the "New" box.

Click browse and locate the file: C:\BillProduction.cfg\BillRDoAction.exe
and click on the Open button.
Replace the word **command** by your command(s)
Example to send Hello on the Serial Port use: {TX_SERIAL[Hello{ASCII:13}{ASCII:10}]}

To see all possible commands, please consult the manual Bill Redirect
http://www.billproduction.com/Bill_Redirect_Manual.pdf

**Click on button: Save Configuration
TEST**

 PERSONALIZE

You can personalize my software with your company name, logo, skins, password, directory... With this possibility you can distribute my software with your company information ! The end user, will think that you are the creator of this software !

- To Extract the current configuration setting, just type in the field password: **SAVE_SKIN**
- After this action, a message box appear to indicate where is the configuration.
- Now you can modify this configuration files for what you want (Skin*.*).
- To re-load your skin modification type in the password field: **LOAD_SKIN**
At startup my software load automatically your configuration
To open the mouse position monitor, type MOUSE in the field password and move the main window in the left top corner.

How change the default configuration directory:
By default the configuration of my software is in the directory: C:\BillProduction.CFG
To change this directory:
> - In the same directory that my .exe application or in your C:\ modify the file: **BPCFGDIR.TXT**
> * This file contain the default configuration directory.
> * Several BillRedirect softwares in differents computers, can use the same directory over the network. If the configuration changed in a computer, then other computers automatically synchronize in the next 5 seconds.

All the configuration is by default in C:\BillProduction.cfg*. then to duplicate the configuration from a computer to another, just copy this directory.*
* Don't forget to close Bill Redirect on target computer before copy the configuration.
